滴滴-国际化

2023-05——至今

滴滴国际 | AI探索

持续关注AI前沿产品，推动团队进行AI驱动的设计方案与功能规划，结合实际业务需求，挖掘AI能力落地，实现体验与业务目标的深度融合。

DiDi International | AI Exploration

Continuously monitor cutting-edge AI products and drive the team to develop AI-driven design solutions and feature planning. By aligning with real business needs, explore practical AI applications to achieve a deep integration of user experience and business objectives.

滴滴国际 | 共性感知

负责共性感知方向的设计工作，聚焦于多端体验一致性与高复用场景的提炼，推动平台级标准化建设。同时优化国际化产品的视觉与交互风格，提升全球用户的使用体验。

DiDi International | Shared Perception

Currently leading cross-platform experience alignment by refining shared design patterns and reusable components. Also optimizing visual and interaction styles for international products to enhance global user experience.

滴滴国际 | 日本C端产品设计 日本市场开拓，负责本地化设计适配与“点呼”流程设计，提升体验并满足合规要求。

DiDi International | Japan C-End Localization Led localization design for Japan market launch, including UI adaptation and tenko process design to meet compliance and usability needs.

麦哲伦产品体验优化

通过用户访谈与问卷调查，对主观数据与客观数据进行数据分析，进行深度优化
Magellan Product Experience Optimization
Conducting user interviews and surveys, we analyze both subjective and objective data to deeply optimize the user experience.

设计资料库建立

从0-1的建立B端设计资料库，包括对于主要产品的核心功能与流程等，提升写作效率与信息共享
Establishment of Design Repository
Building a B2B design repository from scratch, encompassing core functions and processes of key products. The goal is to enhance writing efficiency and facilitate information sharing.

字节跳动-火山引擎

2021-07——2023-02

视频云基础体验优化

视频点播，智能处理，RTC实时音视频，velmageX等产品统筹优化，主要针对页面基础问题的频繁出现，以及新老问题的交替，体验问题解决与推进效率低的问题进行优化与解决。制定长短期规划进行稳步推进，解决视频云基础体验问题**600+**，对整个平台的基础体验有了较大的提升
Optimization of the foundational experience for Video Cloud:
Coordination and optimization of products such as video on demand, intelligent processing, real-time audio-video communication (RTC), VelmageX, etc. Mainly targeting the frequent occurrence of basic page issues and the alternating

appearance of new and old problems. Optimization and resolution of experience issues were carried out, addressing the inefficiencies in problem-solving and progress. A long-term and short-term plan was implemented for steady advancement, resolving over **600** foundational experience issues in Video Cloud and significantly enhancing the overall platform's foundational experience.

视频云中台物料库建设

由于历史原因导致视频云中台多个产品多个风格，在细节体验中并不统一，无法体现火山引擎品牌旗下的产品一致性，因此推动视频云物料库建设，主要把控整体进度与协调组内人员进行落地，通过与研发团队持续完善物料库的建设，使多媒体物料库完成通用页面的**80%覆盖率**，共建设**39**个组件，**11**个区块以及**8**个页面，模块数达到物料团队第一

Construction of the Video Cloud Middleware Material Library:

Due to historical reasons, the Video Cloud middleware had multiple products with different styles, lacking uniformity in detailed experiences and failing to reflect the consistency of products under the Volcano Engine brand. To address this, the construction of the Video Cloud material library was initiated. The main responsibilities included overseeing the overall progress, coordinating internal team members for implementation, and collaborating with the development team to continually improve the material library. The aim was to achieve an **80%** coverage of common pages in the multimedia material library. This involved constructing **39** components, **11** blocks, and **8** pages, making it the first in the material team in terms of module count.

字节跳动BABI（经营分析）平台

从0到1的主导BABI 产品重构与优化，主要进行了BABI易用性的优化，从视觉到交互重新进行了梳理，与产品经理共同重构产品架构，并取得了阶段性成效，有效改善了BABI的用户体验，并得到公司内部认可

ByteDance's BABI (Business Analysis) Platform:

Led the reconstruction and optimization of the BABI product from scratch, starting from 0 to 1. The focus was on enhancing the usability of BABI, involving a comprehensive redesign of visual and interactive elements. Collaborated with product managers to restructure the product architecture, achieving significant milestones in the process. This effort resulted in a notable improvement in the user experience of BABI, gaining recognition within the company.

快手-音视频 kuaishou

2020-03——2021-07

快手云剪 (onvideo)

从0到1的重构快手云剪，从视觉至交互进行了全新建设，并引入新的交互方式，直接面对用户进行了完整的，并沉淀了10+外观专利，发明专利1个直播工作室，web直播伴侣，云导播台，视频会议等多媒体产品其他视频云产品进行了重构迭代与优化，并沉淀专利5+，发明专利1个

Rebuilding Kuaishou Cloud Cut from scratch, from visual to interactive, underwent a complete redesign. It introduced new interaction methods, directly engaging with users and **accumulating over 10 appearance patents, along with one invention patent.**

Various multimedia products, including live studio, web live companion, cloud director, video conferencing, underwent reconstruction iterations and optimizations. Additionally, other video cloud products went through restructuring and improvement, resulting in the accumulation of over **5 patents and one invention patent.**

360企业安全-奇安信

2017-03——2020-03

奇安信科技集团股份有限公司（以下简称奇安信，股票代码688561）成立于2014年，专注于网络空间安全市场，向政府、企业用户提供新一代企业级网络 Qihoo 360 Technology Co., Ltd. (hereinafter referred to as Qihoo 360, stock code: 688561) was established in 2014, focusing on the cybersecurity market. It provides next-generation enterprise-level cybersecurity solutions to government and corporate users.

工作内容：

主要负责建立奇安信设计系统，以及云安全管理平台，天擎等中台产品设计，以及数据可视化大屏设计

Responsible for establishing the design system at Qihoo 360, as well as designing mid-platform products such as the Cloud Security Management Platform, Tianqing, and handling the design of data visualization dashboards.

奥维云网

2015-06——2016-01

北京奥维云网大数据科技股份有限公司是一家专注于智慧家庭领域的大数据综合解决方案服务商，为行业内企业提供数据研究和大数据服务。

Beijing Ovayun Net Big Data Technology Co., Ltd. is a comprehensive big data solutions provider focusing on the smart home sector. The company offers data research and big data services to businesses within the industry.

工作内容：

主要负责奥维云网舆情大盘及相关中后台与移动端设计

Responsible for the overall design of the Ovayun Net public opinion dashboard, as well as related back-end, and mobile interfaces.

NDP Media CORP

2014-06——2015-05

NDP Media CORP，2009年成立于美国，2010年正式进入中国，是全球规模最大的移动互联网公司。2013年底，旗下业务包括Mobile Affiliate

Network 、Media Buying、全球推广、专业Facebook/ Twitter/Adwords精准投放、手游全球发行等。

NDP Media CORP was established in the United States in 2009 and officially entered China in 2010. It is the world's largest mobile internet company. By the end of 2013, its business portfolio includes Mobile Affiliate Network, Media Buying, global promotion, precise advertising on Facebook/Twitter/Adwords, and global distribution of mobile games.

工作内容：

广告联盟平台PC端与app端设计

The design of the Advertising Alliance platform for both PC and app interfaces.
